

Brownfields 2016 Cleanup Grant Fact Sheet

Mt. Shasta, CA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for petroleum

EPA has selected the City of Mt. Shasta for a brownfields cleanup grant. Petroleum grant funds will be used to clean up the central area of the Old Mill within The Landing Commerce Park Mt. Shasta at 2329 South Mt. Shasta Boulevard. The eight-acre site was used for lumber mill operations from the 1900s until the late 1960s, and is contaminated with petroleum hydrocarbons. Grant funds also will be used to support community involvement and outreach activities.
